1 GENERAL INFORMATION

VimpelCom Holdings B.V. (**"VimpelCom"**, the **"Company"**, and together with its consolidated subsidiaries, the **"Group"** or **"we"**) was established as a private company with limited liability under the laws of the Netherlands on June 29, 2009.. The registered office of VimpelCom and principal place of business is located at Claude Debussylaan 88, 1082 MD Amsterdam, the Netherlands. The Company is an indirectly owned subsidiary of VEON Ltd. ("**VEON**").

The special purpose interim condensed consolidated financial statements are presented in United States dollars (**"U.S. dollar"** or **"US$"**). In these notes, U.S. dollar amounts are presented in millions unless otherwise indicated.

Nature of operations and principal activities
VimpelCom earns revenues by providing voice and data telecommunication services through a range of traditional and broadband mobile and fixed-line technologies. As at June 30, 2017, the Company operated telecommunications services in Russia, Pakistan, Algeria, Bangladesh, Ukraine, Uzbekistan, Kazakhstan, Armenia, Tajikistan, Georgia, Kyrgyzstan and Laos, and in Italy via a 50/50 joint venture.

During the six month period ended June 30, 2017, several local currencies demonstrated significant volatility against the U.S. dollar, which impacted the Company's financial position and results of operations following the translation of non-U.S. currency amounts into U.S. dollars for consolidation purposes. In particular, in U.S. dollar terms, the fluctuations of local currencies caused a 7% increase in total revenue for the Group for the six month period ended June 30, 2017 as compared with the same period of 2016.

In addition, the foreign exchange rate in Uzbekistan applied for consolidation purposes is the official rate published by the Central Bank of the Republic of Uzbekistan. However, this exchange rate is not achievable in expatriating funds out of the country due to long-term restrictions imposed by the local government. The total net assets of the Uzbekistan operations contributing to the consolidated financial position of the Group as at June 30, 2017 amounted to US$778. However, if the Company applied the exchange rate implied by market transactions, the net assets would decrease significantly in U.S. dollar terms.

2 BASIS OF PREPARATION OF THE SPECIAL PURPOSE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

BASIS OF PREPARATION

The special purpose interim condensed consolidated financial statements for the six and three month periods ended June 30, 2017 have been prepared in accordance with IAS 34 *Interim Financial Reporting*.

The special purpose interim condensed consolidated financial statements do not include all the information and disclosures required in the annual consolidated financial statements, and should be read in conjunction with the Group's audited annual consolidated financial statements as at and for the year ended December 31, 2016.

The preparation of these special purpose interim condensed consolidated financial statements has required management to apply accounting policies and methodologies based on complex and subjective judgments, estimates based on past experience and assumptions determined to be reasonable and realistic based on the related circumstances. The use of these judgements, estimates and assumptions affects the amounts reported in the statement of financial position, income statement, statement of cash flows, statement of changes in equity as well as the notes. The final amounts for items for which estimates and assumptions were made in the consolidated financial statements may differ from those reported in these statements due to the uncertainties that characterize the assumptions and conditions on which the estimates are based.

New standards, interpretations and amendments adopted by the Group

The accounting policies adopted in the preparation of the special purpose interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements as at and for the year ended December 31, 2016.

A number of new or amended standards became effective as at January 1, 2017. However, the Company did not have to change its accounting policies or make retrospective adjustments as a result of adopting these standards.

The following are significant and relevant new standards that are issued, but not yet effective, up to the date of the issuance of the Group's financial statements, and which have not been early adopted by the Company:

- IFRS 15 *'Revenue from contracts with customers'* — The Group is continuing to assess the impact of IFRS 15, however, based on the analysis performed so far, the Company does not expect any material impact on revenue recognition due to currently existing product offering (i.e. prevailing pre-paid service offering). However, the Company does expect a potential impact stemming from capitalization of costs incurred in acquiring contracts with customers upon adoption in 2018.
- IFRS 9 *'Financial instruments'* — The Group is in the process of assessing the impact of IFRS 9, which may be material to the consolidated income statement and consolidated financial position of the Company, upon adoption in 2018.
- IFRS 16, *'Leases'* — The Group has yet to assess the impact of IFRS 16, which may be material to the consolidated income statement and consolidated financial position upon adoption in 2019.
- IFRIC 23 *'Uncertainty over income tax treatments'* — The Interpretation, clarifies application of recognition and measurement requirements in IAS 12 *'Income Taxes'* when there is uncertainty over income tax treatments. The Group has yet to assess the impact of IFRIC 23, which may be material to the consolidated income statement and consolidated financial position upon adoption in 2019.

As a result of this anticipated transaction, the investment in the Euroset joint venture was classified as an asset held-for-sale at June 30, 2017. 4 SEGMENT INFORMATION

Management analyzes the Company's operating segments separately because of different economic environments and stages of development in different geographical areas, requiring different investment and marketing strategies. Management does not analyze assets or liabilities by reportable segments.

Management evaluates the performance of the Company's segments on a regular basis, primarily based on earnings before interest, tax, depreciation, amortization, impairment loss, loss on disposals of non-current assets, other non-operating losses and shares of profit / (loss) of associates and joint ventures (**"Adjusted EBITDA"**).

From the first quarter of 2017, management has included the Italy Joint Venture (see Note 6) as a separate reportable segment, due to its increasing contribution to the Company's overall financial result and position.

Financial information by reportable segment for the six and three month periods ended June 30, 2017 and 2016, is presented in the following tables, with the exception of the Italy Joint Venture, for which financial information is presented in Note 6. Inter-segment revenues between operating segments are on an arm's length basis in a manner similar to transactions with third parties. The segment data for acquired operations are reflected herein from the date of their respective acquisition.

5 INCOME TAXES

Current income tax is the expected tax expense, payable or receivable on the taxable income or loss for the period, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Income tax expense consisted of the following for the six and three month periods ended June 30:

	Six month period		Three month period	
	2017	**2016**	**2017**	**2016**
Current income taxes	199	298	91	159
Deferred income taxes	10	(46)	(23)	(24)
Income tax expense	**209**	**252**	**68**	**135**

In the first half of 2017, the difference between the statutory tax rate in the Netherlands (25.0%) and the effective corporate income tax rate for the Group (197.2%) was primarily driven by non-deductible expenses in respect of share of loss of joint ventures and associates and impairment of joint ventures and associates, reducing profit before tax by US$196 and US$110, respectively, as well as the income tax losses arising from early debt redemption for which no deferred tax asset has been recognized, reducing profit before tax by US$124. The fair value of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The fair values were estimated based on quoted market prices for our bonds, derived from market prices or by using discounted cash flows under the agreement at the rate applicable for the instruments with similar maturity and risk profile.

The carrying amount of cash and cash equivalents, trade and other receivables, and trade and other payables approximate their respective fair value.

(in millions of U.S. dollars unless otherwise stated)

The fair value of derivative financial instruments is determined using present value techniques such as discounted cash flow techniques, Monte Carlo simulation and/or the Black-Scholes model. These valuation techniques are commonly used for valuations of derivatives. Observable inputs (Level 2) used in the valuation techniques include LIBOR, EURIBOR, swap curves, basis swap spreads, foreign exchange rates and credit default spreads of both counterparties and our own entities.

The fair value of Available for sale financial assets are determined through comparison of various multiples and reference to market valuation of similar entities quoted in an active market. If information is not available, a discounted cash flow method is used.

Fair value measurements for financial liabilities at amortized cost are based on quoted market prices, where available. If the quoted market price is not available, the fair value measurement is based on discounted expected future cash flows using a market interest rate curve, credit spreads and maturities.

FAIR VALUE HIERARCHY

As at June 30, 2017 and December 31, 2016, the Group recognized financial instruments at fair value in the statement of financial position.

The fair value hierarchy ranks fair value measurements based on the type of inputs used in the valuation; it does not depend on the type of valuation techniques used:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3: inputs are unobservable inputs for the asset or liability

The following table provides the disclosure of fair value measurements separately for each major class of assets and liabilities.
